

LIGEO™

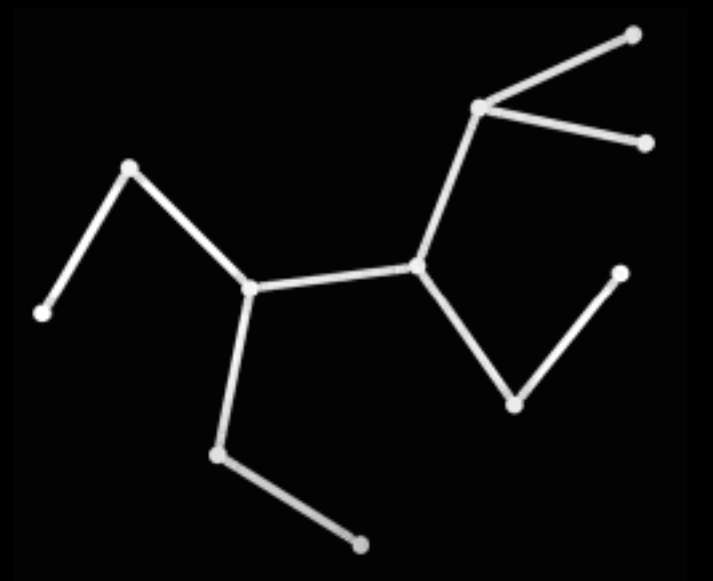

LIGEO™ SL

Modular LED-lighting system that enables multiple two- and three-dimensional designs.

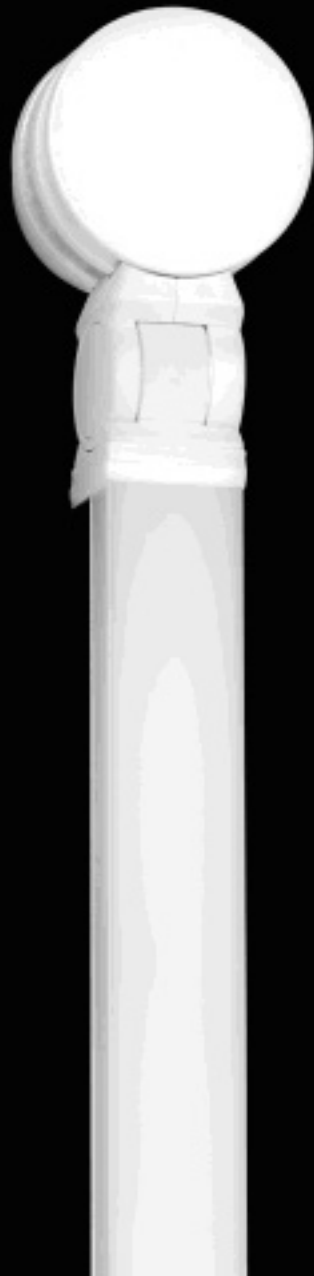

From two-dimensional grids to amorphous shapes – both are quick and easy to construct.

Multiple ways of creating three-dimensionality – from simple patterns to complex structures.

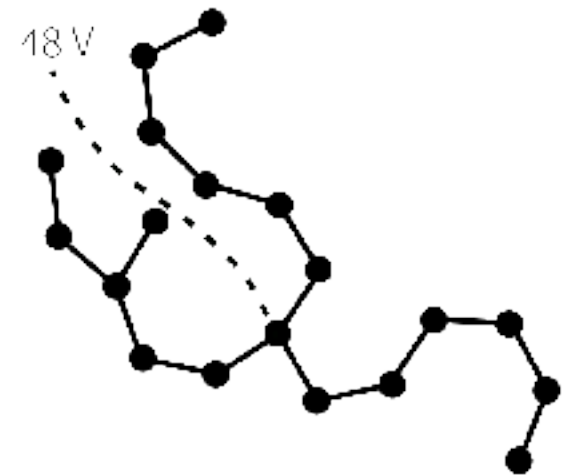

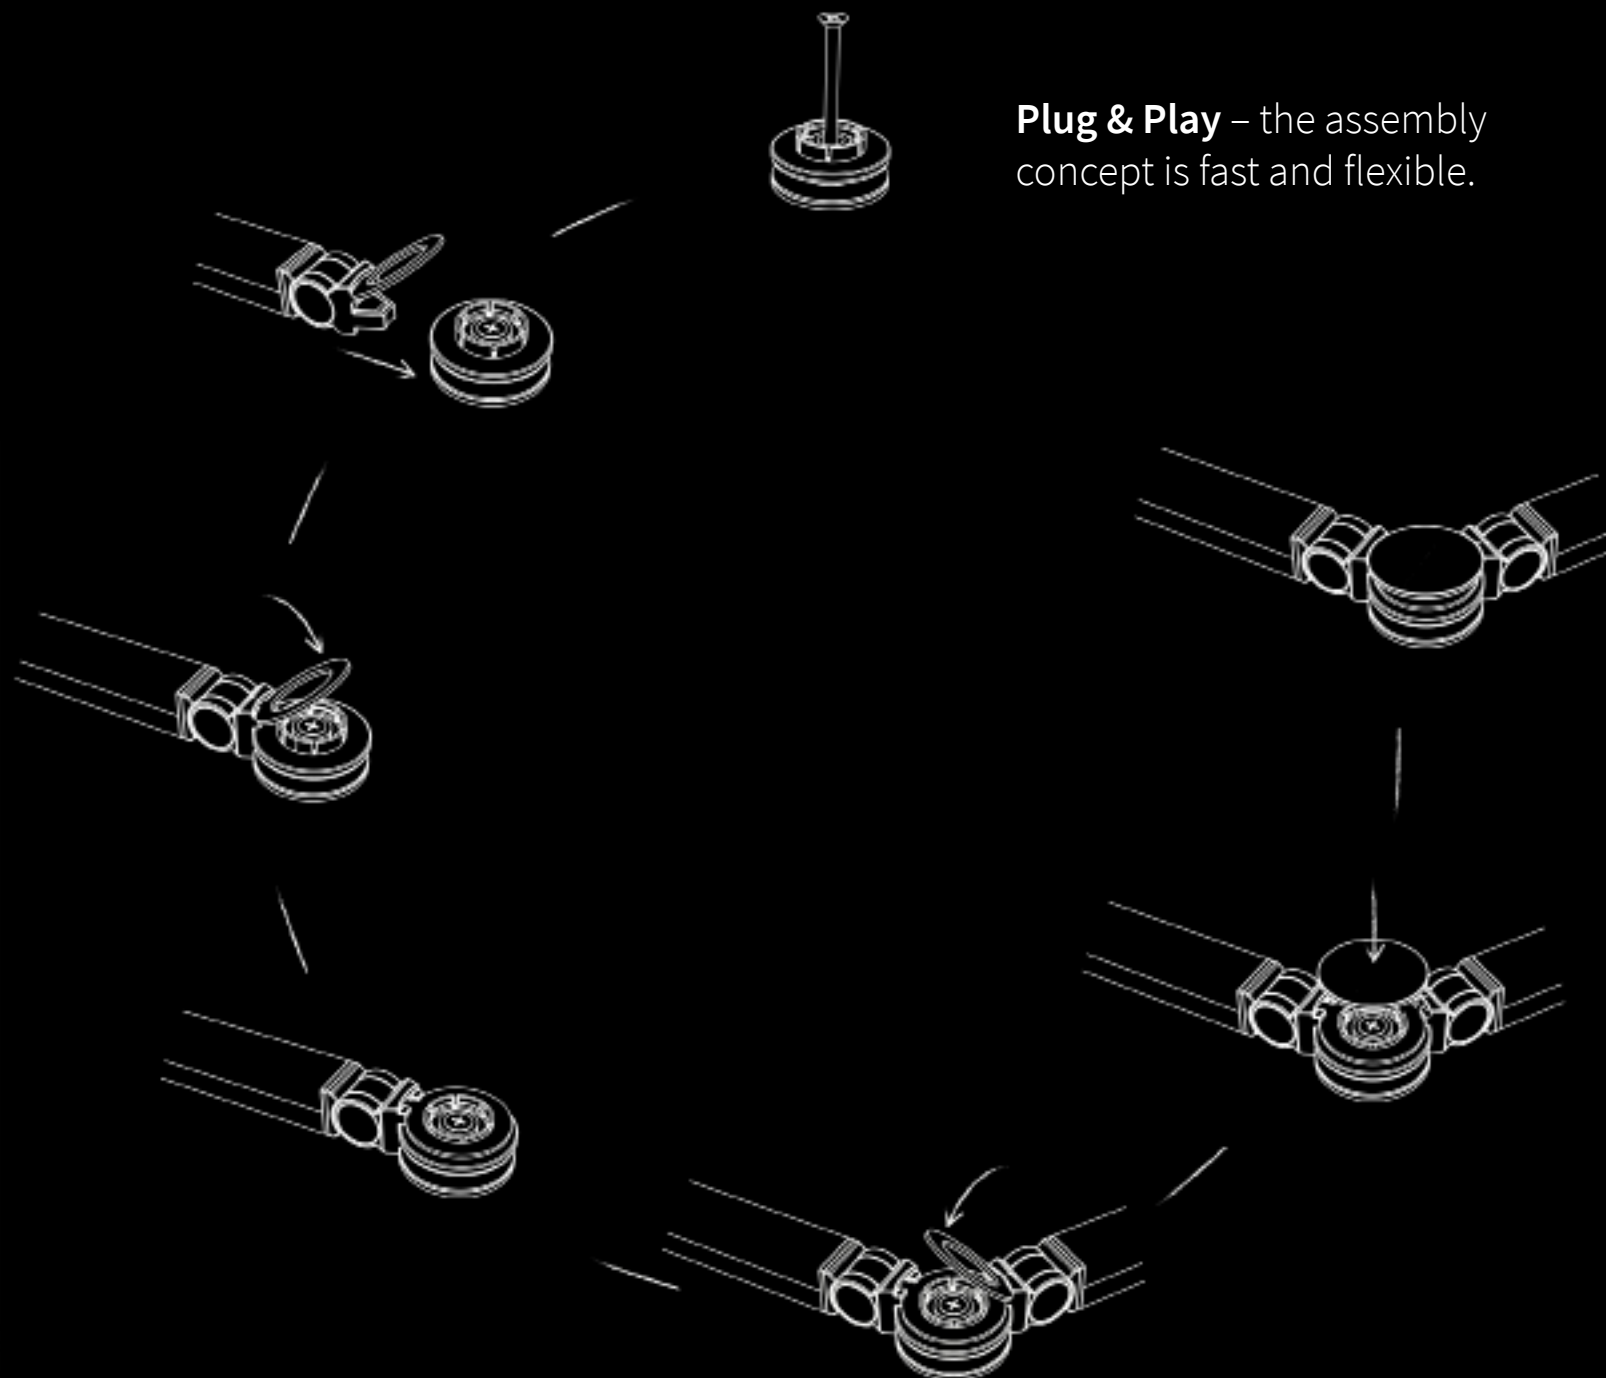

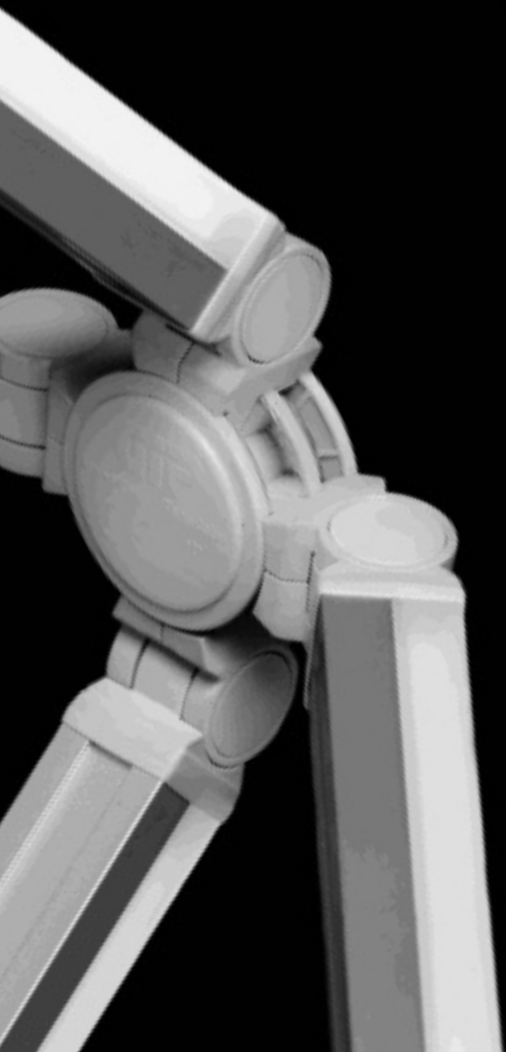

Light bars & hubs

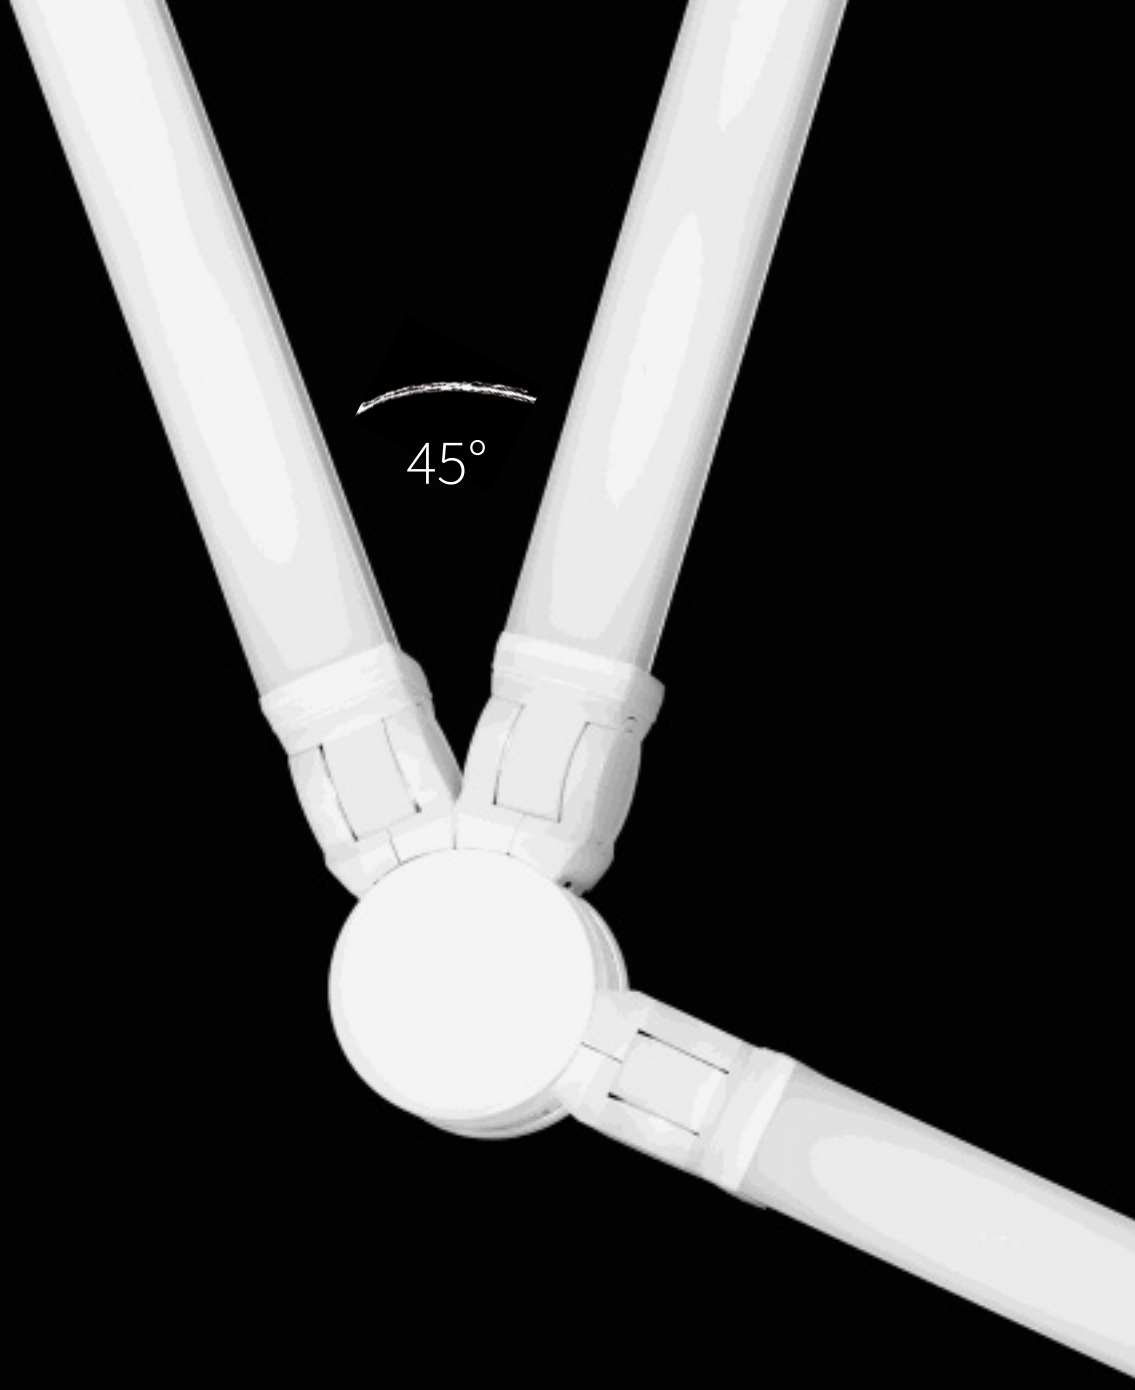

Power feed-in possible at any hub, from which up to 15 m of light bars can be powered.

(or even 30 m, if power feed-in is placed central)

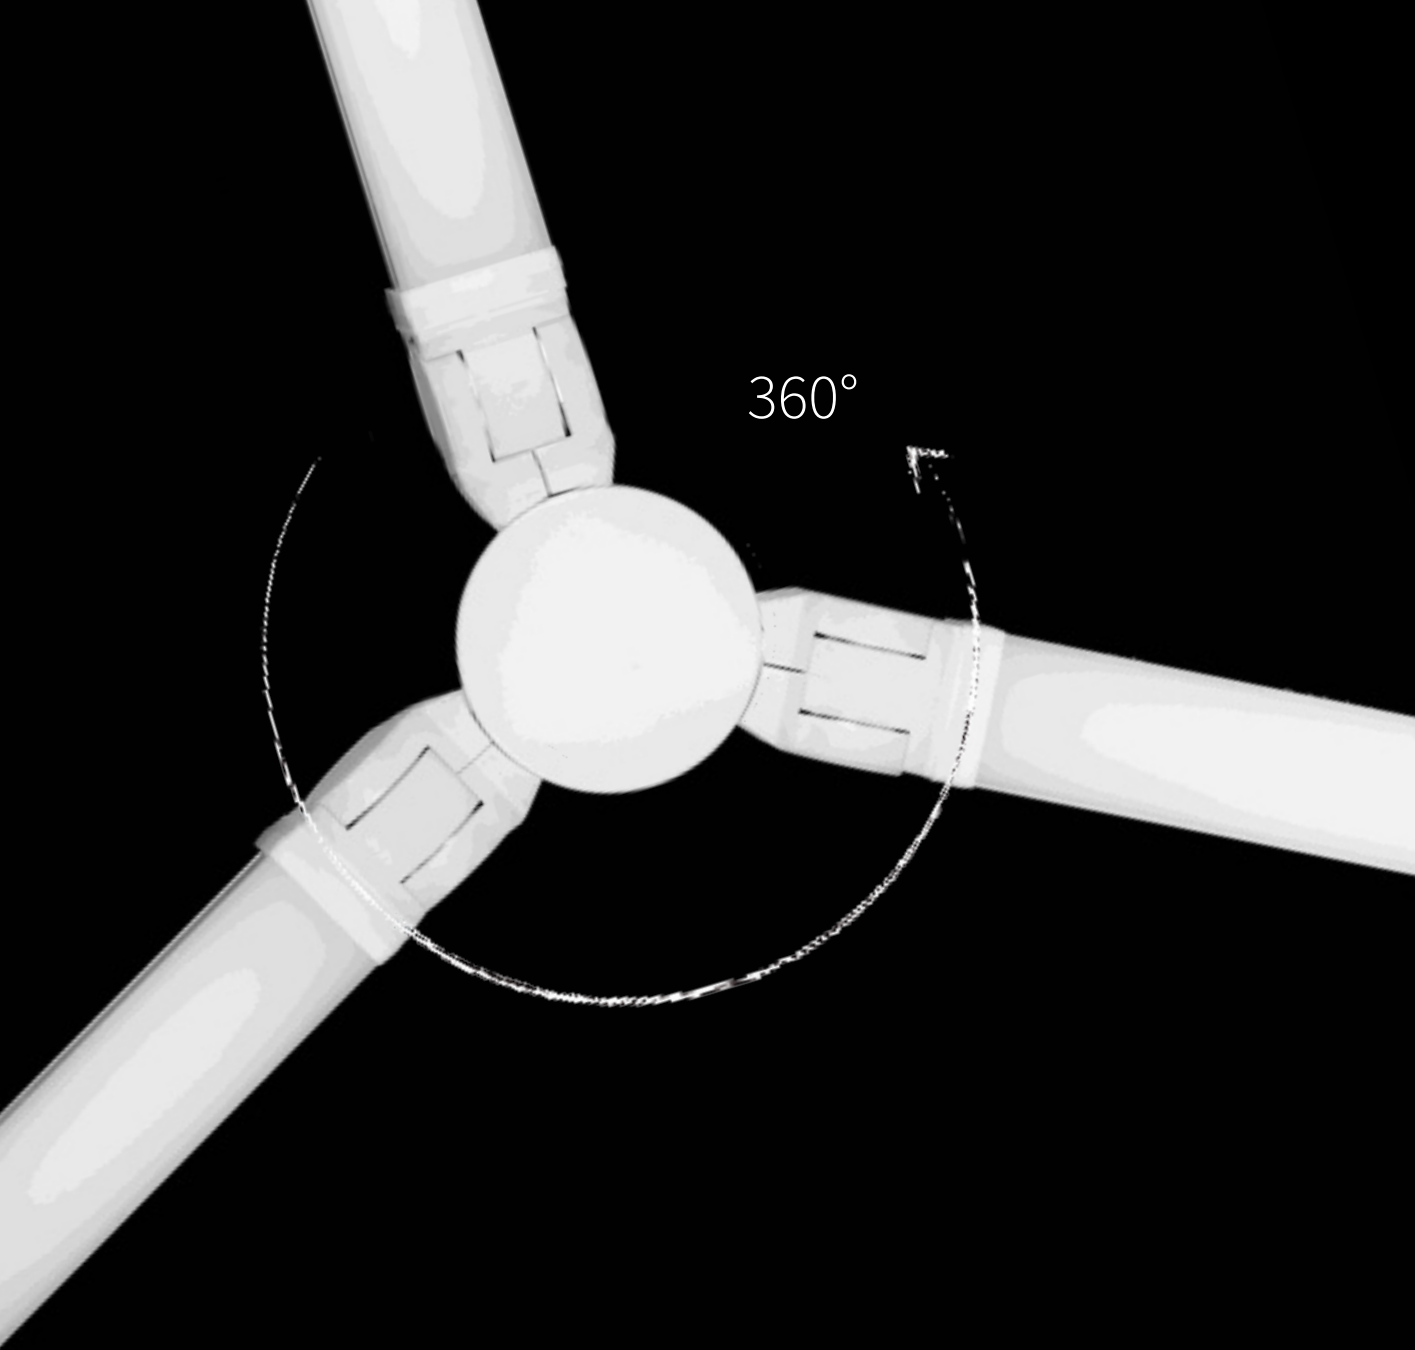

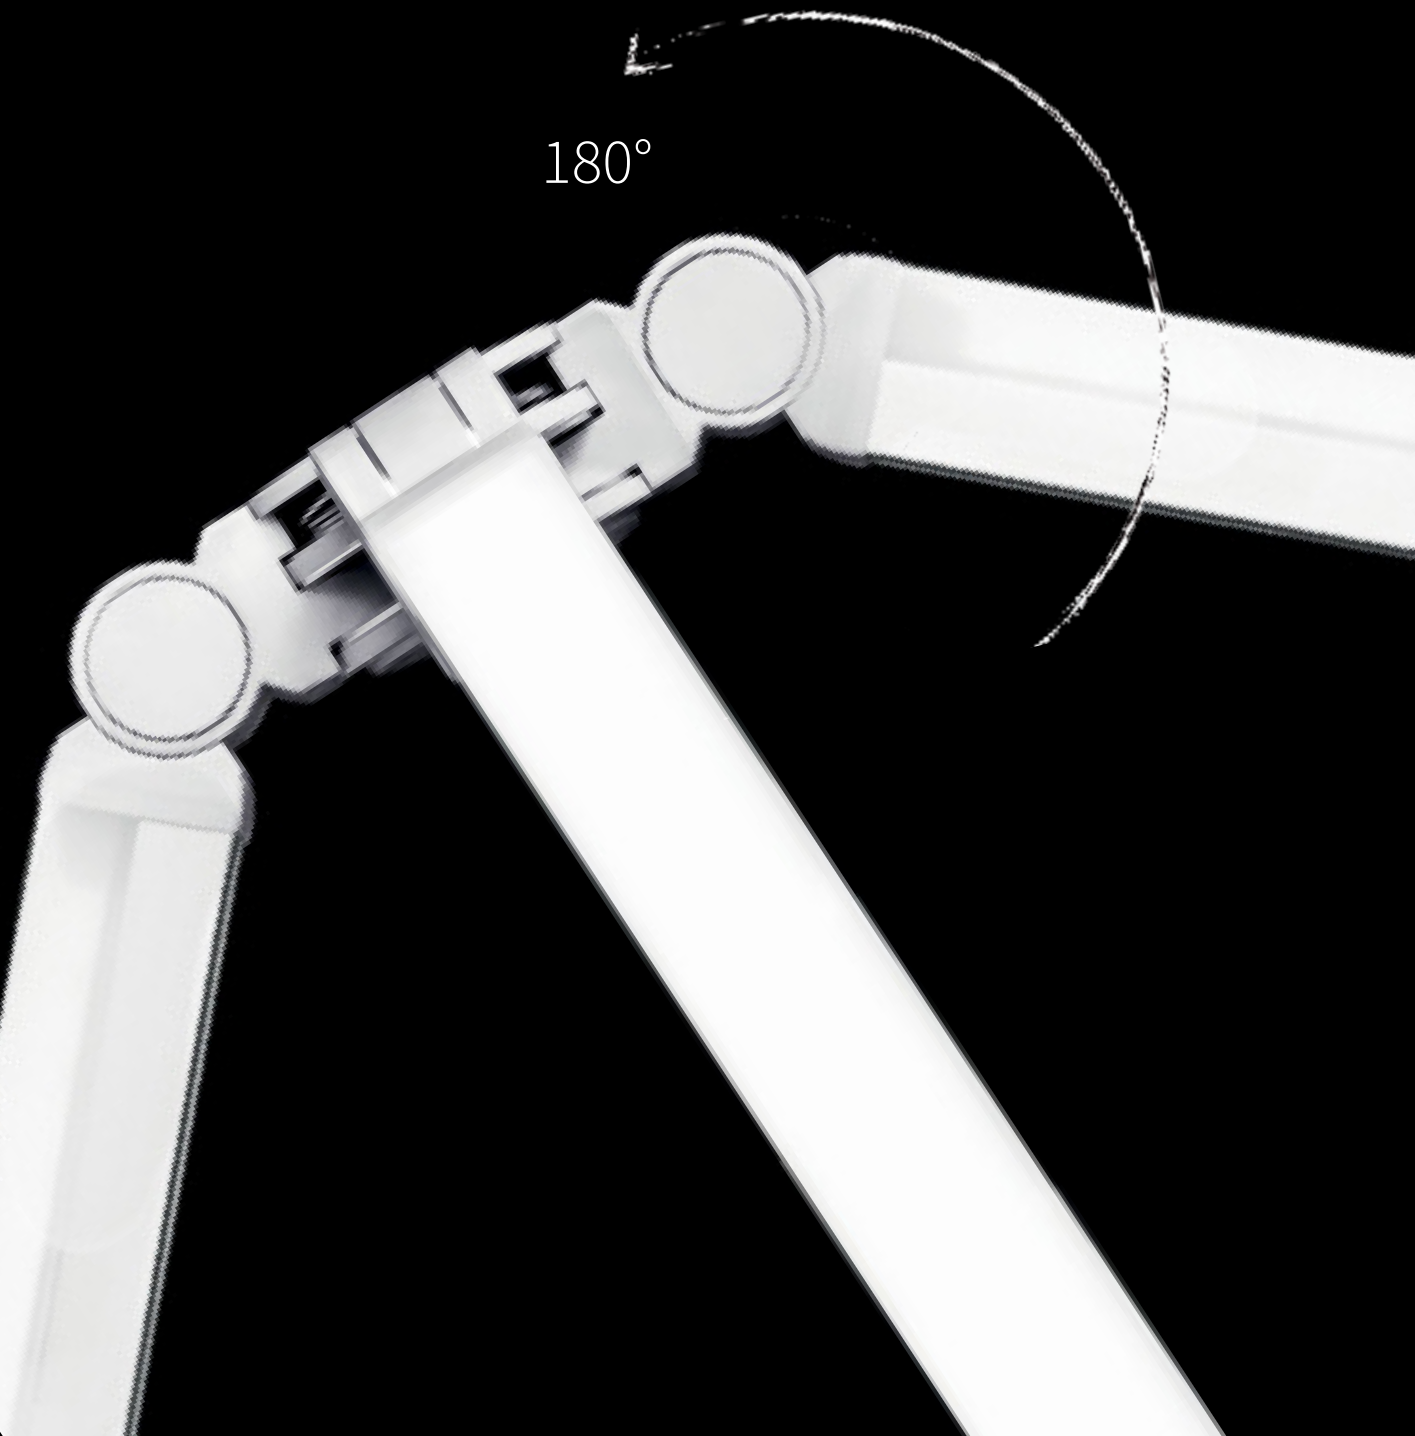

Plug & Play – the assembly concept is fast and flexible.

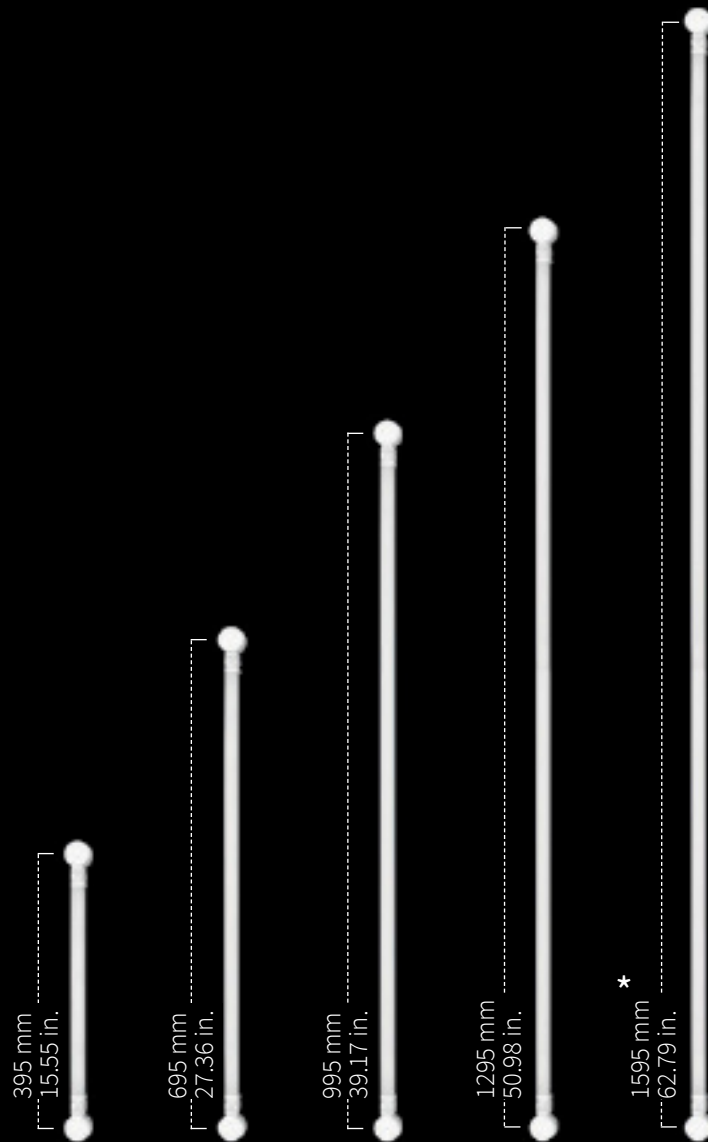

Each **hub** can host up to **8 light bars**. There is a minimum angle of **45° between the light bars**.

Stepless **360° rotatability** around the hub.

All light bars can be **tilted up to 180°**.

Available in **5 different sizes**
from 300 mm / 11.81 in. to
1500 mm / 59.05 in.

Install length – from one hubs
center to the other one – additional
95 mm / 3.74 in.

* discontinued length

Hubs and hinges available in **4 different colors:** black, white, gold, silver.

Aluminum frames are offered in black or silver anodised and gold finished.

Or **customised colors** to fit the different areas of application:

Home

The right colortemperature for each area: **LEDs** available from **warm white** to **daylight white**.

Office

Suitable for work space lighting, offers **1650 lm per meter**.

Stepless **dimming** – for complete constructions or individual sections

Retail & Gastronomy

Quick and easy to customise
or **rearrange**.

Exhibitions, Events
& Trade Fairs

The **RGBW version** offers a **high quality white working light** as well as the **full range of RGB colors**.

For large installations or extraordinary lightshows like in clubs or at events – each individual tube can be **controlled by cable using DMX**.
